

## TECHNOLOGY SAFETY BY DVCS

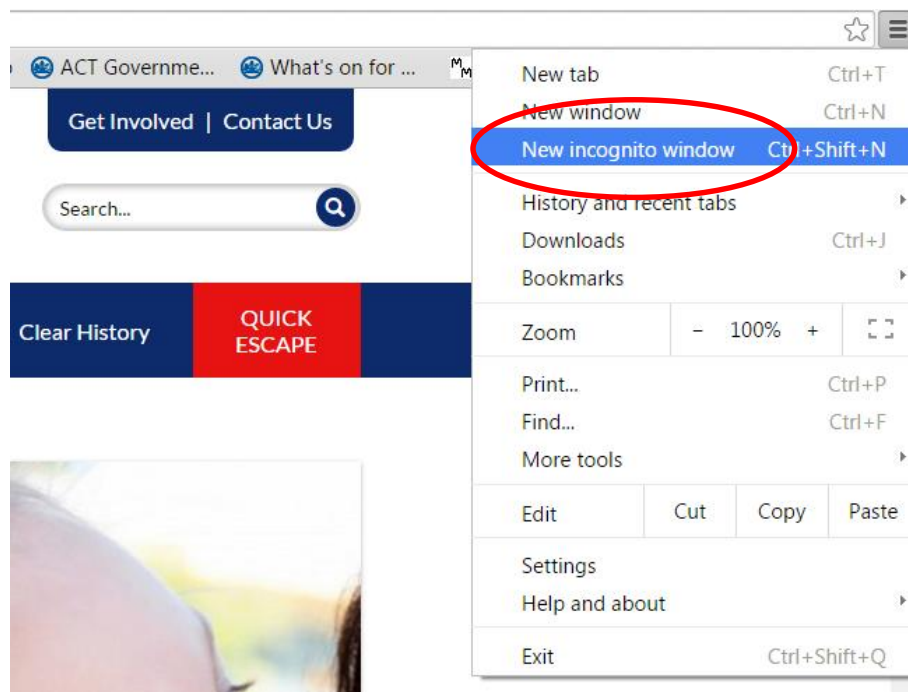

### Google® Chrome

How to set your Google® Chrome browser to search the internet without leaving a trail:

1. Open your Google® Chrome browser as usual. Click on “Settings”:

2. Click on “New incognito window”:

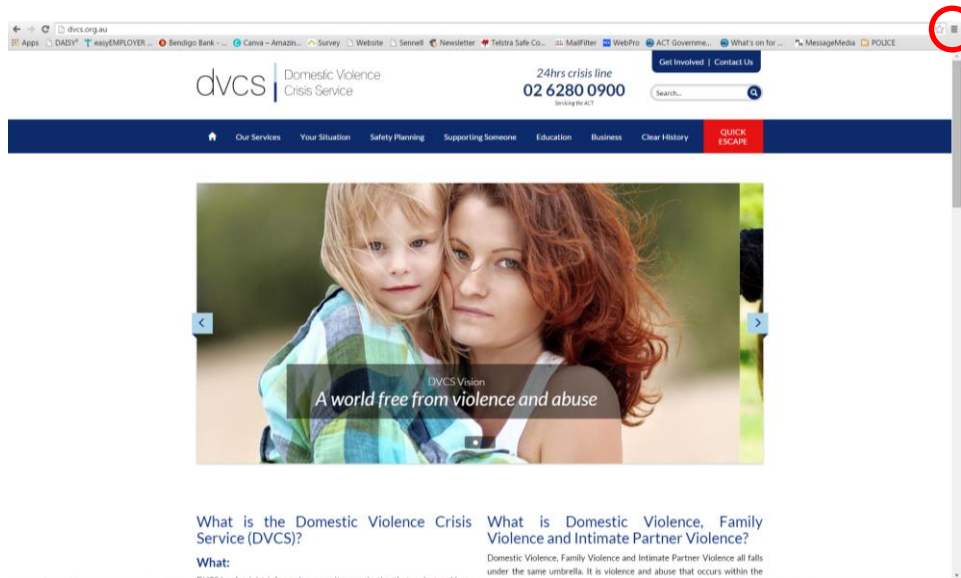

3. A new browser will open up. It should have a little hat and glasses in the top corner. When you have finished browsing it is important you close this window. Closing the window will delete your history during this session:

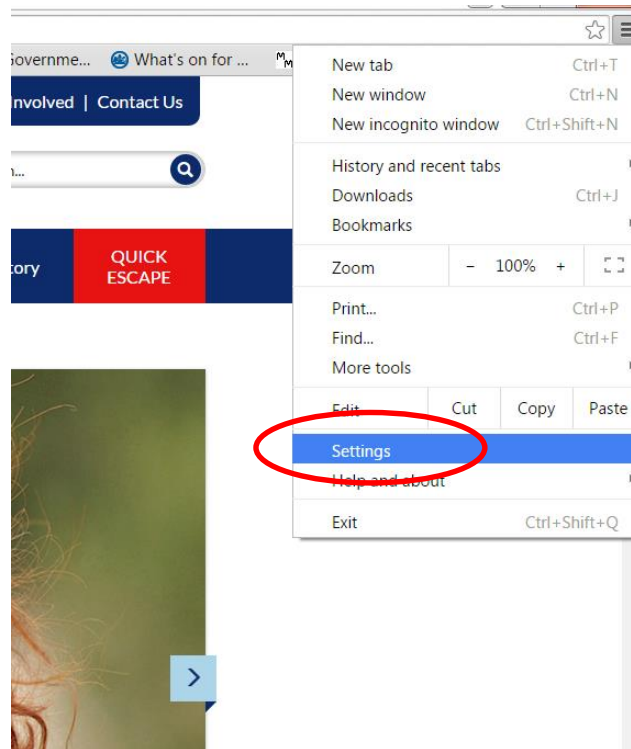

## How to delete your browsing history in Google® Chrome

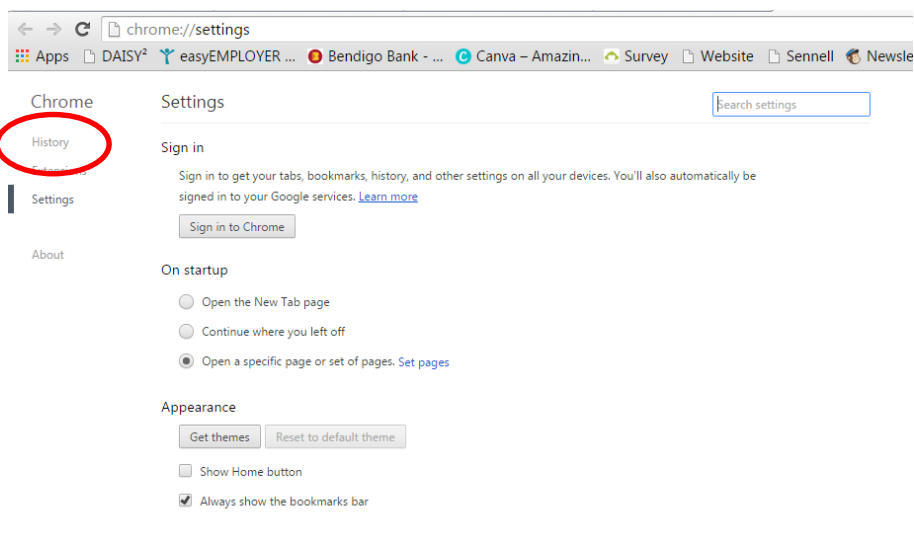

1. Open your Google® Chrome browser as usual. Click on “Settings”:

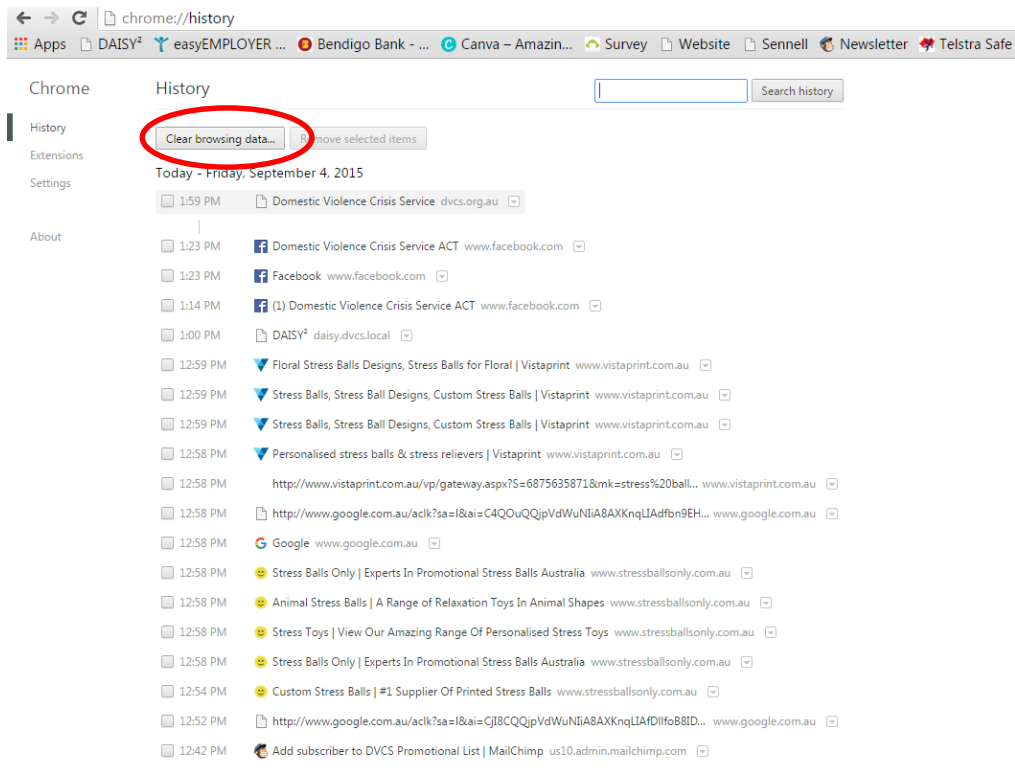

2. Click on “Settings”:

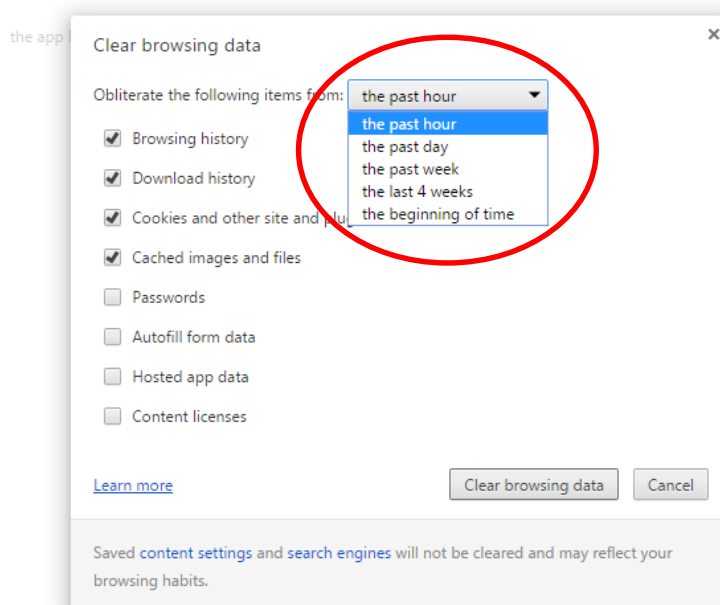

3. Click on “History”:

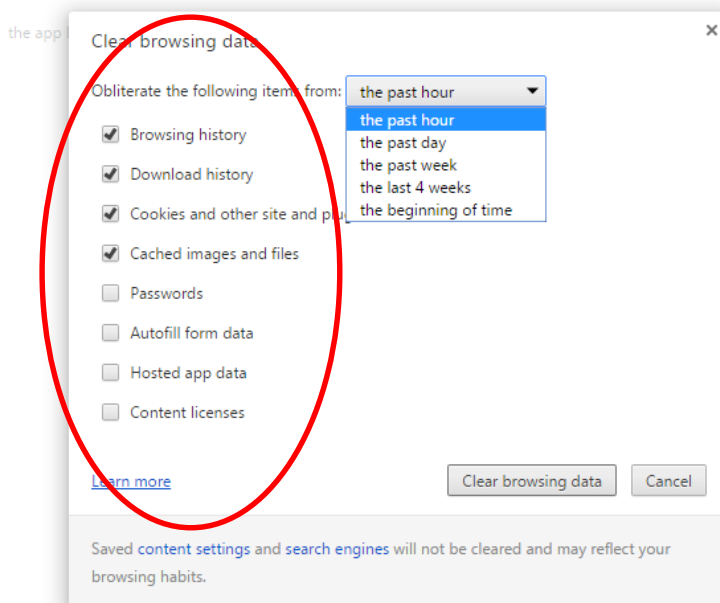

4. Click on “Clear browsing data...”:

5. Click on your selected time period, by selecting the drop down menu:

6. Ensure you have deleted your “Browsing History”, “Download History”, “Cookies and other site and plugins” and “Cached images and files”. The rest of the options are optional, but consider who else uses this computer and whether passwords and autofill form data should be deleted or not:

7. Click on “Clear browsing data”:
