

TECHNOLOGY SAFETY BY DVCS

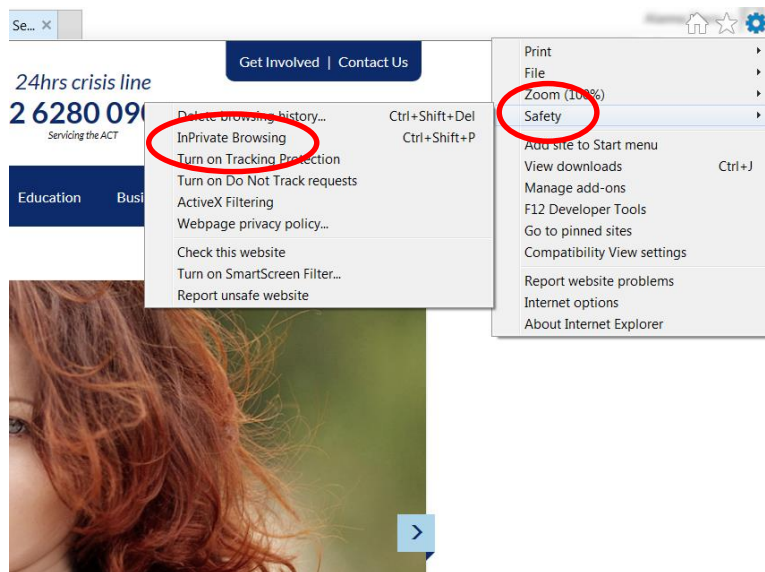

Internet Explorer®

How to set Internet Explorer® to search the internet without leaving a trail:

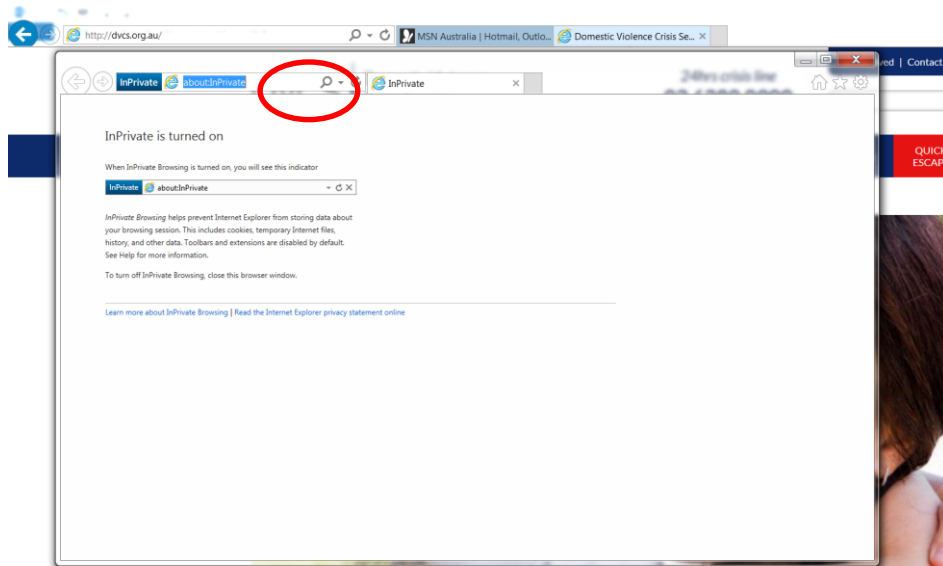

1. Click on “Settings”:

2. Select “Safety” and then “InPrivate Browsing”:

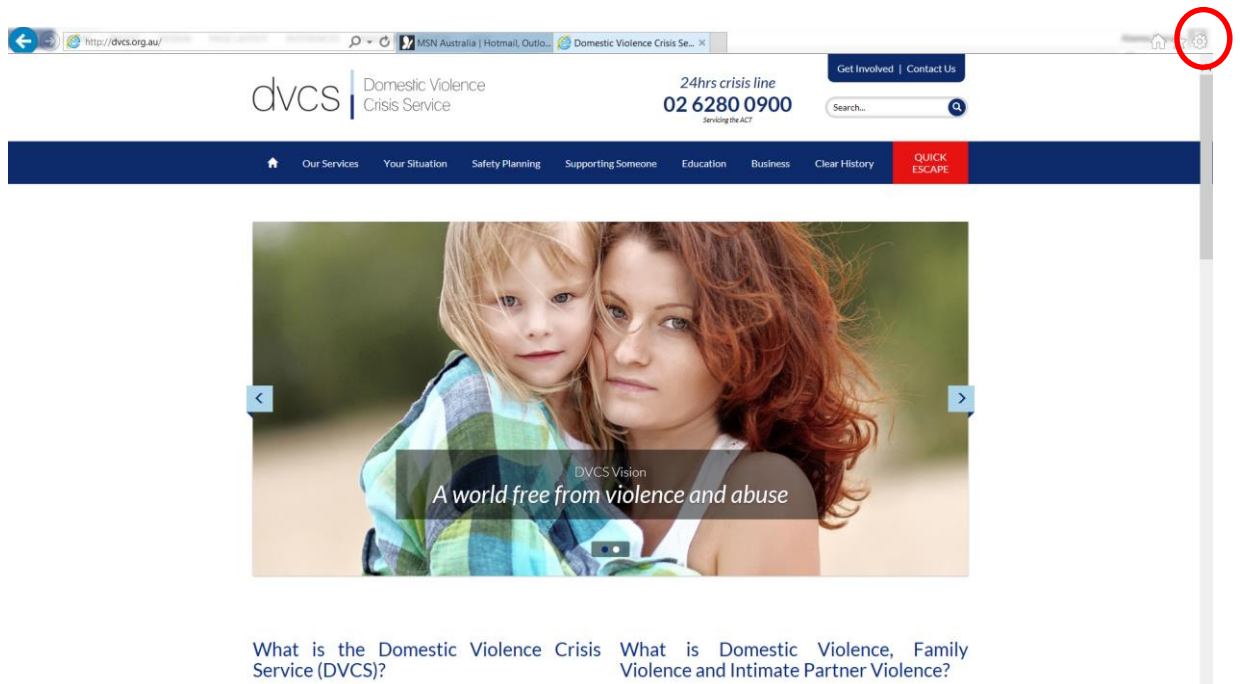

3. A new Internet Explorer® window will open with the words “InPrivate” at the top, so remember to close this window once you have finished browsing.

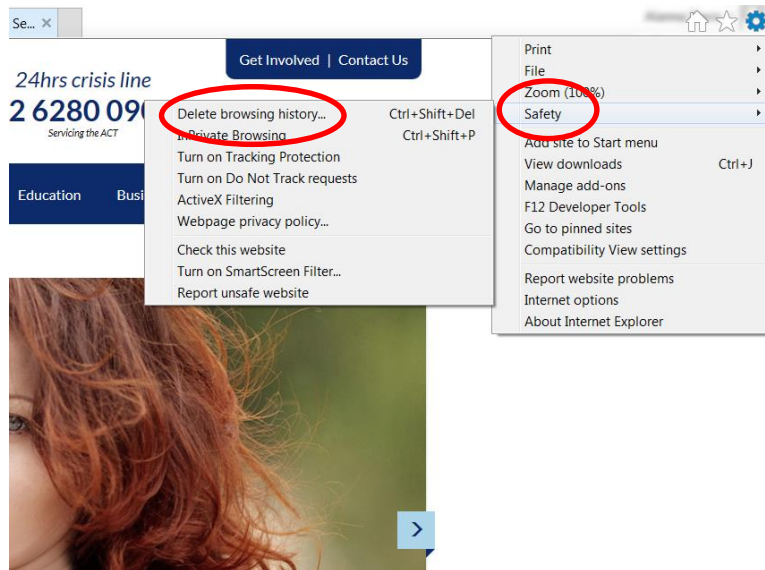

How to delete your browsing history in Internet Explorer®:

1. Click on “Settings”:

2. Select "Safety" and then "Delete browsing history":

3. Ensure you have selected "Temporary Internet files and website files", "Cookies and website data", "History" and "Download History". The rest of the options are optional, but consider who else uses this computer and whether passwords and autofill form data should be deleted or not, then click on "Delete":
