### iPhone® Medical Emergency App

#### How to set up your iPhone® Medical Emergency App

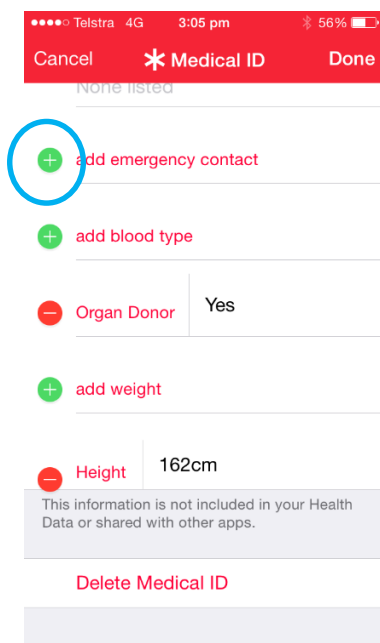

1. Once you have all the latest software updates uploaded on your iPhone®, look for the “Health” App:

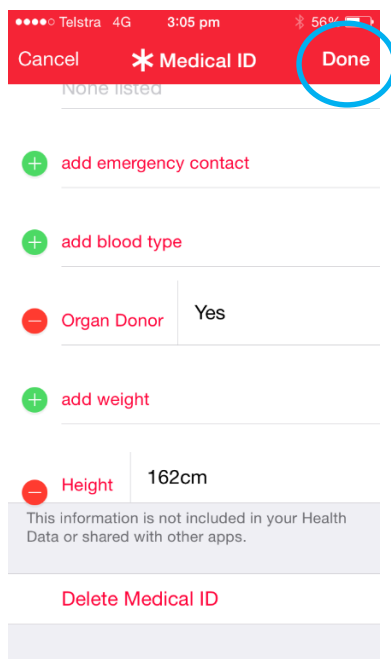

2. To ensure your Medical ID can be accessed without the need to know your iPhone®'s pin number, made sure you have turned it on here. Alternatively, if you don't want your Medical ID to be accessed without knowing your iPhone®'s pin number, make sure you have switched it off, this means there will be no green showing:

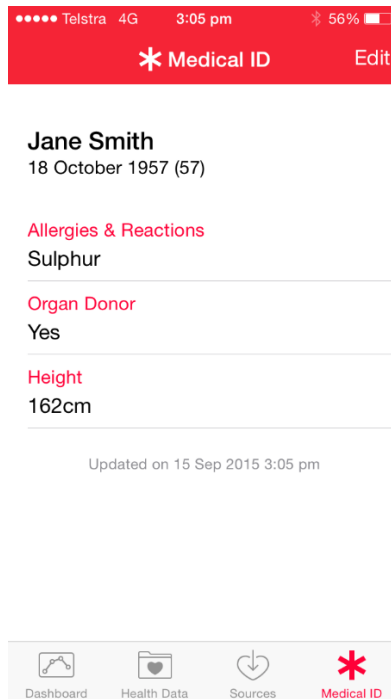

3. To edit your information, such as your name and birth date, please tap on the green plus buttons and type in your information. You can also add an emergency contact from your telephone's contact list:

4. Once you have updated all your information, please tap on "Done":

5. You have now saved your Medical ID. Once saved it should show all the information you have completed, similar to below, including your Emergency Contacts.

6. If it is not safe for you to keep your Medical ID on your iPhone®, you might want to delete it. To do this, please follow Step 1 and then tap on “Delete Medical ID”:
